The Biggest Development on Soundclick in Years!

A lot of you buying this product are probably going to skip right to this PDF first in order to see what the big deal about Soundclick is, and what's been found. Well the fact is I don't know everything yet... I can't tell you exactly how far this extends or whether or not Soundclick will adjust itself to the changes. All I can tell you is what I have found.

Today is Tuesday, September 13th, 2011. That means I'm writing these final pages just 2-3 days before this product drops, and so you can be sure these results are... Well, legitimate:

As You Can See, My Company Beats4Legends is #9 Today & Rising... I'm Hoping for #1 By Morning...

The screenshot shows the Soundclick website interface. At the top, there's a navigation bar with links like 'My.SoundClick', 'Music', 'Community', and 'Forum'. Below this, a breadcrumb trail reads 'Home > Music > Instrumentals Charts'. The main content area displays the 'Instrumentals Music Charts' with a list of 10 tracks. The 9th track is 'Beats4Legends.com - ***NEW*** Pieces Of The Mobb ((FREE DL))' in the 'Hip Hop' genre. To the right of the charts, there's a banner for the 'TWISTA REMIX CONTEST' and a 'Promo Song of the Day' section featuring a song by 'Stuntman (WHPBEATS.COM)'. At the bottom, there's a search bar and a list of sub-genres including 'Beats General', 'Classical', 'Club Bangas', etc.

How did I get here?

Well somebody finally cracked the code and figured out exactly how Soundclick runs its chart's positioning. All I can tell you is that it's not even about plays! The biggest secret in the past 4-5 years of Soundclick's history, is... The fact that it's much more about WHAT the visitors do on your site! Basically what I'm saying is you could get 500 plays on your VIP page and appear in the top 10! That can

only happen if the traffic you send is highly interactive with your content. This probably means they stay longer, download songs, click on one of the links within the song description, etc. But the fact of the matter is, if you find highly interactive Soundclick users to click your stuff, download and listen to the songs over and over... Bam! Test it out! You just need a small group of friends, maybe 10-20 people, to make accounts with Soundclick and test different interactions VS your charts positing. Do testing!

Currently I'm using traffic gathered from SEO (search engines) as well as Soundclick members (who I think have a large part to play in this, but I'm still testing). The POINT is there's about 5 companies that have come up so far since I discovered this and they're ALL able to get you in the top 10! But instead of using their systems, create your own. Gather highly interactive Soundclick users onto a list of some sort and promote every new beat to them! The clicks will go a lot further than you think. Even a few clicks from Soundclick users who interact with your site well, such as download the track, plays it many times etc, will get you topping charts regardless how you do it! Each Soundclick account/play/download has to be from a different IP address, but there are systems which allow you to change your proxies, so...

This information blew my mind and made me go after the best traffic I could find, SEO traffic. Because it blew my mind and OBVIOUSLY changed the way I market myself. Now I am only buying traffic from the highest quality websites, so I can be sure I fly up in those charts quickly! All my sales are rising!

Soundclick Charts Boost: How to Find the People Who Interact With Your Site

If you want to get up in the charts on Soundclick, you're going to need the right visitors coming to your website. This means separate IP address per person. Also they're going to need accounts! Make sure everybody you use for this has a Soundclick account. Having a VIP account probably makes this work a lot better, so look to find a team of producers willing to help each other... You want to find a bunch of producer's you can bring in on one team... So all 10 producer's could promote the same page and get as many super-interactive people as you can to visit your website.

This means you need lists of real fans. Highly qualified leads, and make sure a lot of them are from Soundclick! Your Soundclick accounts are what is going to help you fly through the charts. So how can you amplify this? EASY! Find more people who have Soundclick accounts, specifically VIP accounts, and get them onto your networks!

This could be Facebook, Twitter, etc... Remember: you can connect your Soundclick tracks from Facebook onto your Soundclick tracks! Soundclick wants you to do this, they were the ones who created the Soundclick app for Facebook.

So this means you could get a boost in the charts using your own Facebook page. And how can you make that boost even higher? Of course! By having more friends from Soundclick! The more people from Soundclick who go to your page, visit your site and mess with your content... The better! But it just really means a lot if they're targeted.

HUGE TRICK 4 SOUNDCLICK, TRY AT YOUR OWN RISK!!!!

So you know you can alter CSS on your Soundclick account, right? A pretty recent update (not really), but it allows you to do all sorts of cool stuff. One of the COOLEST things that they've allowed is being able to actually cover up their links, so it's ALL your site.

If you've bought my other products you may understand more so than others why this is so powerful, but I'll try to wrap it up quickly... It works like a pitch page because since there's no other place for your visitors to go, they're forced to interact with your website. That means they're much more highly likely to visit your social network sites, interact with your store, etc.

HOWEVER: be warned. We are not responsible for what happens to your account for this. Soundclick was pretty unhappy at certain people who did this, but if you're not in the top 10 on Soundclick you might not get caught. Again, try at your own risk! Usually, as long as your nice, your account won't get deleted... You might get suspended, but plead dumb and act like you didn't know it was wrong. Which you wouldn't probably. Anyway, here's the code to put in your CSS to blank it out:

```
.completeNavHeader {z-index: 999; position:relative; opacity: 0; top:-1000px;}
```

ANOTHER HUGE, JUICY TRICK:

Gather 100% of Buyers onto a "Buyer's Mailing List"

Step 1: Visit this website and set up your Aweber account with PayPal (5 minutes):

<http://www.aweber.com/faq/questions/234/How+Do+I+Integrate+PayPal+With+AWeber%3F>

Step 2: Log into Aweber and click "Create and Manage Lists". Make a new list for your buyer's, call it something like "companybuyers123" or whatever. This is going to be your buyer-only list

Step 3: Change your PayPal email in MyFlashStore.net to YOUR AWEBER email address (explained at the link right above step 2^)

Done! Now every single person who buys will be added to your buyer's list... One more thing.

How to Automate it so when Someone Moves from your Regular list (leads) to your Buyer's list (clients):

Step 1. Log into PayPal and load up your regular mailing list (leads).

Step 2: Go to: > My Lists > Automation >

Step 3: Set it to "Unsubscribe from (leads list) when email signs up to (buyers list)"

Step 4: Click "Save"

Done! Now everytime someone buys, they're automatically removed from your leads list and added to your buyers list. Cool huh? AWESOME!!!! Made me feel like a million dollars when I found this out.

THE DOWNSIDE:

The biggest problem here... You won't be notified when you make a sale, you'll have to manually check your MyFlashStore account on a regular basis to know when you made sales (a small cost for collecting all your buyer's emails!)

WANT THIS TO CHANGE?

MyFlashStore doesn't allow you to set your Notification email to be different from your PayPal email. If you want this to change, CONTACT MyFlashStore support @ <http://www.myflashstore.net> and try to convince them to add this feature! This will solve the problem, so you'll be notified everytime!

This is one of the biggest advancements in beat-marketing EVER! So don't miss out on this!!

A/B Split Testing With Wordpress Sites, Made Easy!

If you have a website with Wordpress installed on it, then you can use this trick. I've talked about A/B split testing in my past products... But there's now a way to do it from your site in a highly optimized way. This is going to put you in the realm of REAL internet marketing.

Just add the plugin to your website "Google Optimizer". It will allow you to make A/B sites and make slight changes, such as the change of your headline, to test the outcome of each site. Do this and you can make your sales fly up without increasing costs!

In fact, getting good at the skill of testing your content to raise sales will actually LOWER your costs because as you tend to write better advertisements, you tend to make more money. Trust me I've had some runs where I put out content that I thought would sell and didn't because I didn't provide enough proof. Such is life!

Testing is the most important part of my marketing. Any time I try a new promo I just put down a few dollars, maybe a couple hundred if the promo really works. See, if I waste \$200 trying out all the different kinds of promo a site has to offer, then it's not a waste at all. I did that with a new service and have seen huge success.

It's important to remember that buying every type of promo you can get your hands on is probably a good idea if you can afford it. Just don't EXPECT results.
